Dear Parent/Guardian,

Cobb Pediatric Associates retains the use of Nurse Practitioners in our office for those levels of service that have been approved by the Georgia State Board of Medical Examiners. Regulations require that health care services delivered by a nurse practitioner be within the scope of the Nurse Practitioner's professional education and experience.

Our Policy is that if a parent/guardian chooses, the patient may see a Nurse Practitioner for three (3) consecutive visits. Following these visits, the patient will then be asked to schedule with one of the Physicians. At this visit, the physician provider will review the patient's chart to ensure there are no other problems or concerns.
