

January, 2013

Dear Parent/Guardian:

During a well visit, your child's health care professional may also discover a "condition" or illness that requires diagnosis, treatment or follow-up. Charges for this will be covered as an illness visit by insurance, which may require a copay or co-insurance or deductible to you. Determination of any patient responsibility comes from the insurance company according to your individual policy benefits.

Thank you for your understanding.
